Part III Detailed Action

1. Applicant's election of claims 157-188 in Paper No. 26 is acknowledged. Because applicant did not distinctly and specifically point out any supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 54-156 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 26 filed 12/16/2002.

This application contains claims 54-156 which are drawn to an invention nonelected without traverse in Paper No. 26. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 U.S.C. § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 157-188 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 158 presents that the caller identification data is transmitted from the telephone answering apparatus to the paging network 'over a direct connection', this directly negates the transmitting which has already occurred in claim 157 'utilizing the telephone network', thus it is not clear what is definitely intended of the phrase "utilizing the telephone network" as applied in claim 157 when used in conjunction with the direct connection of claim 158, only alternatives are provided and it is not clear that there is enablement for different alternative to be used together as claimed in this combination.

In claim 167, "said optional data" lacks antecedent basis, optional data was first referred to in claim 166, see also claims dependent from claim 167 in making any changes to claim 167.

It is not clear of the support of each and every alternative form of optional data as listed in conjunction with the embodiment presented by claim 167 and dependents therefrom as well as claim 170 and dependents therefrom, which correspond to figures 2a and 2b, in particular it

is not clear the video and image combination are clearly presented in the embodiment claimed in the elected invention.

Claims 181 and 182 cause confusion with respect to the initiating of a new connection by 'transmitting the stored "voice" signals'...it is not clear if this is intended to refer to the stored caller identification data as the voice signals being referred to here are synthesized voice signals generated at the device, thus storing these signals would be storing the generated voice signals, it is not clear where such an alternative is clearly described in the embodiment elected.

In claim 183, it is not clear where this alternative device is clearly described in conjunction with the elected invention.

In claim 184, it is not clear where the transmitting of the identification information over the cellular network is provided in conjunction with the transmitting over the telephone network which has already been provided in claim 157, it is not clear if the intent is to merely refer to the telephone network already referred to in claim 157 as being a cellular communication network.

In claim 188, it is not clear where this alternative device is clearly described in conjunction with the elected invention.

Conclusion

4. Due to the nature of the confusion as noted above with respect to each of the claims indicated, the definite patentability of each claim can not be determined at this time.

5. The prior art made of record and not relied on is considered pertinent to the claimed subject matter.

Art Unit: 2645

6. Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. **Any response to this action should be mailed to:**
